

Passive Column Speakers

NOIRE D Series

NOIRE D Series by Aberman is the most compact version of this family. Regardless to its sizes D Series still provide professional-quality of sound with a wide dynamic range, high sound pressure levels and amazing quality of sound, same as other NOIRE series column speaker. The elegant design that combines sleekness and modern aesthetics is made by Audio Creation Xperts department of our European Engineering Team. The high quality speaker components especially focused on the music and voice reproduction for sound reinforcement tasks. The NOIRE Series column speaker series are one of the best choices you can make for your project.

The D Series is the smallest size version of NOIRE column speaker model range. It uses two inch low-mid drivers and providing maximum performance, power and sound quality.

D Series contains of three different models - D4, D8 and D12. Each speaker model uses different quantity of 2" high efficient one way full range frequency drivers and one silk dome tweeter. This product range gives a perfect way to choose the best solution for different environments, setups and occasions. The wide range of mounting accessories helps not only to do mounting fast and easy, but reliably and flexible to match many of different challenges and scenarios.

NOIRE D series offers maximum quality with high sound sensitivity and coverage, being able to reach between 89db to 95db depending on the model, with 90° x 30° working angle.

The NOIRE column speakers could be used in multiple configurations using optional accessories. Speakers of this size are ideal for a wide variety of applications, from conference rooms and lecture halls to shopping malls, clubs, and much more, ideal for indoor use.

The NOIRE speakers are simple and powerful solution for virtually every audio need. Whether it's a small installation or even if you need acoustic power the D series are an ideal choice for your project.
